KARTIKA P. PARKER

SENIOR QA / SOFTWARE TEST ENGINEER | BUSINESS ANALYST
Oklahoma City, OK | (405) 406-9147 | Jnk0909@gmail.com

PROFESSIONAL SUMMARY

Senior QA / Software Test Engineer and Business Analyst with 20+ years of healthcare technology experience in software quality assurance, manual testing, data validation, requirements analysis, claims processing, provider and pricing configuration, and technical documentation. Proven expertise executing functional, regression, UAT, UI, batch, database, conversion testing across complex enterprise environments. Leverage SQL Server and Oracle to validate data, investigate discrepancies, analyze defects, and support root-cause analysis. Translate business and technical requirements into user stories, test cases, and documentation while partnering with developers, product teams, clients, and cross-functional stakeholders.

PROFESSIONAL EXPERIENCE

Gainwell Technologies | *Senior Professional Test Engineer* **April 2018 - September 2026**

- Analyze user stories and bug issue descriptions, reproduction steps, and acceptance criteria alongside related technical documentation to develop comprehensive test cases within the Azure DevOps test management tool
- Collaborate with the developers & Product owners (PPO) each Sprint to ensure a thorough understanding of features or defects and the scope of the testing.
- Author test cases to test the workflow of changes/enhancements. These test cases varied per requirements – UI, batch, bugs, new feature.
- Organize and maintain the test suite in a test management tool Azure DevOps for each sprint & assign test case to each user story/bugs/TDs.
- Execute Functional, Regression & User Acceptance testing using appropriate testing tools such as Event Publishing Test Client, SOAP UI, Remote Desktop Connection to access batch jobs and perform testing activity in UI application and batch jobs.
- Perform data analysis/validation on Microsoft SQL Server & Oracle databases to support testing.
- Create/log any observation found during testing and work together with the developers and PPO to perform issue triage and follow-through on resolving the findings.
- Create bugs/Technical Defects based on findings from the module and cross-module team testing.
- Generate detailed & clear test result documentation, attaching it to each user story/bug.
- Prepare and maintain product documentation, including Release Notes, Configuration Guides, Conversion Guides, and User Guides and sharing them via SharePoint.
- Manage the Regression Testing Repository suite in Azure DevOps for each release, ensuring all features had associated regression test cases for deployment branch validation prior to client release.
- Collaborate with other modules such as cross-module, automation, configuration, and UX teams on TPL related testing & test-case reviews.
- Use Axe tools to support UX accessibility validation testing and help improve product quality.
- Train new testers and provide testing guidance, mentoring, and test case peer review.
- Support client with weekly product meetings & every release/patch activity, including testing questions such as repro steps/acceptance criteria, issue triage, and resolution of TPL-related matters.

EDS / HP / HP Enterprise / DXC | *Business Analyst III - Provider & Pricing Configurator* **March 2008 - March 2017**

- Translated client requirements, business rules, and operational needs into change requests and provider/pricing system configurations.
- Analyzed and tested provider contracts, reimbursement rules, pricing logic, and configuration changes to support accurate healthcare claim processing.
- Investigated complex claims and configuration issues, identified root causes, and delivered resolutions to customer service, finance, clients, and internal stakeholders.
- Safeguarded provider-file data integrity through daily analysis, validation, and correction of import reports, provider correspondence, and configuration records.
- Resolved provider, pricing, claims, and Electronic Remittance Advice issues; executed defect testing and supplied analysis supporting business and technical decisions.
- Prioritized urgent and critical assignments while meeting demanding deadlines, operational requirements, and expected outcomes.
- Authored and maintained Provider Manuals documenting procedures, business rules, configuration guidance, and compliance requirements.

BCBS / Pinnacle Business Solutions, Inc. | *Quality Assurance Specialist - Claims* **July 1999 - March 2008**

- Audited Medicare Part B claims across Oklahoma, New Mexico, and Missouri, applying national processing standards and quality requirements.
- Processed Medicare Secondary Payer and ambulance claims; analyzed contract benefits, resolved processing edits, and routed complex issues to appropriate teams.

Certificates

Front-End Developer Training | Frontend Simplified | HTML, CSS, JavaScript, React | Expected December 2026

Education

Master of Education (M.Ed.) **1994**

Oklahoma City University (GPA: 4.0)

• **Achievements:** Honor Student

Technical Skills

Skills: Software Quality Assurance & testing, Requirements & User Story Creation/Author & Analysis, Test Case Design & Execution, Functional Testing, Regression Testing, User Acceptance Testing (UAT), UI/Desktop Application Testing, SQL Server/Oracle Database Testing & Data Validation, Batch Conversion Testing, Defect Triage & Root-Cause Analysis, Azure DevOps, SOAP UI, Agile / Sprint Testing, Healthcare Claims Processing, Provider & Pricing Configuration, Technical Documentation, HTML, CSS, Git, GitHub
